Perkins. 1664.

A

Prognostication for the year of our Lord God, 1664.

Being Bissextile, or *Leap-year*, and from the Wo.ld's Creation, 5628.

Wherein is contained the description of the four quarters of the year: As also a Chronological Table of many things worth remembrance, since the Creation, until this present year, 1664. Collected for the most part out of Ecclesiastical History, and other good Authors, something augmented.

By F. PERKINS, Well-willer to the Mathematicks.

Printed at *London* by *Robert White*, for the Company of Stationers, 1664.

A Description of the four Quarters of the year, and first of Winter.

☉ in ♑ ♐.

According to the custom of writers in this kind, Winter Quarter is the first Quarter, which took beginning the 11. day of December, at which time the Sun entred into the first degree of the cold and dry sign Capricorn, being the most remote from us in his farthest South declination, causing the dayes with us to be shortest, and the nights longest: which Quarter continuing until the Sun hath slowly passed through Capricorn, Aquarius, and Pisces. This Quarter doth naturally resemble Old age.

Of the Spring.

☉ in ♈ ♉ ♊.

This Quarter doth take beginning the 10 of March, at which time the Sun entreth into the first minute of Aries, and doth continue whilest the Sun is a passing through these 3 vernal signs, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

☉ in ♋ ♌ ♍.

The Summer Quarter doth take his beginning when the Sun doth enter into the first degree of Cancer, which will be this year the 11 of June, and doth continue whilest the Sun passeth through Cancer, Leo, Virgo, now are the dayes longest, and the ayr hottest; therefore but for necessity, bid Physick Adieu.

Of Autumn.

☉ in ♎ ♏ ♐.

Autumn or Harvest Quarter (commonly called the Fall of the Leaf, of some the latter Spring) doth begin when the Sun doth enter into the first degree of Libra, making again the day and the night of equal length; which will be this year, the 13 of September, and doth continue whilest the Sun doth pass through Libra, Scorpio, and Sagittarius. This Quarter doth fitly resemble declining age, and Phlegmatick complexion.

A brief Chronological Description of many things worthy of memory that have hapned since the Creation unto this present year of our Lord 1664. with the year of the World in which they hapned in the first Column, faithfully collected from many good Authors.
